Passwörter sind geschützt durch ein Master-Passwort

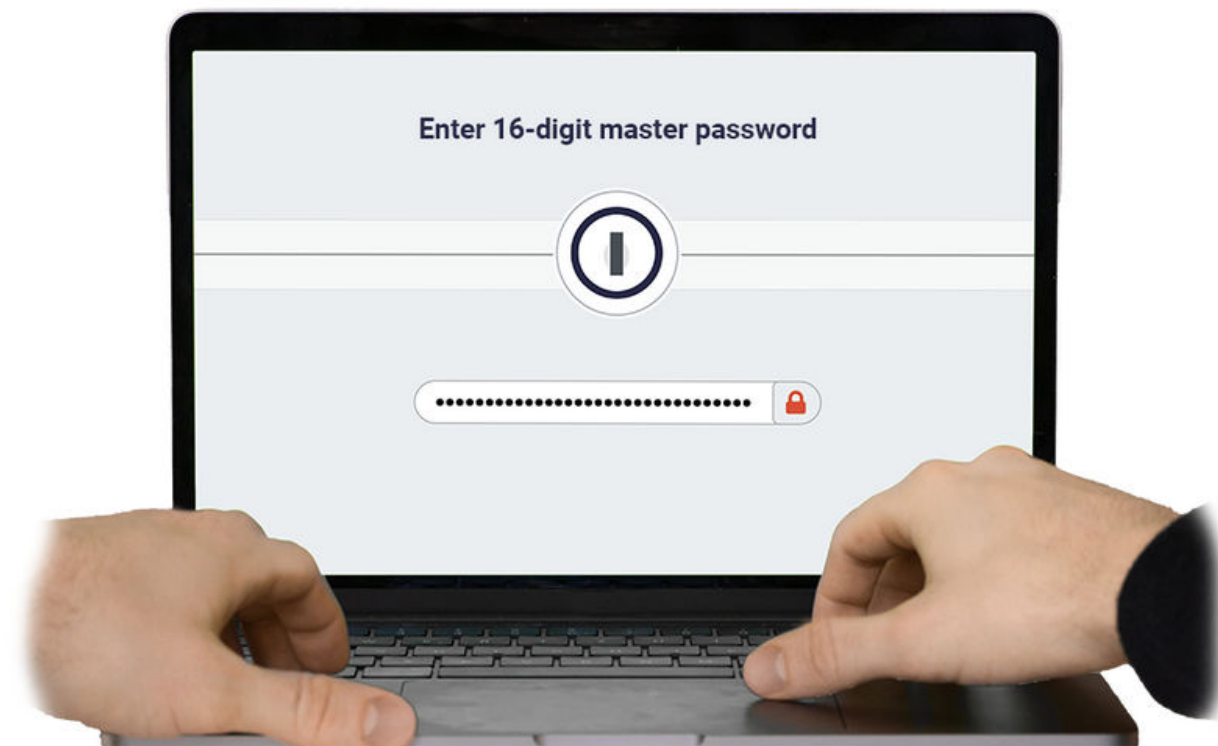

1Password LastPass... DASHLANE

Das Master-Passwort ist unsicher & verhindert die Breite Nutzung durch Nicht-ITler

**Langes & komplexes Master-Passwort
muss regelmäßig eingegeben werden**

- **28%** verwenden ihr Master-Passwort für mehrere Website-Konten wieder
- **LastPass-Hack im Jahr 2022** aufgrund von Master-Passwörtern
- **~120k EUR Opportunitätskosten** für die Eingabe von Master-Passwörtern (Unternehmen mit 1.000 Benutzern)

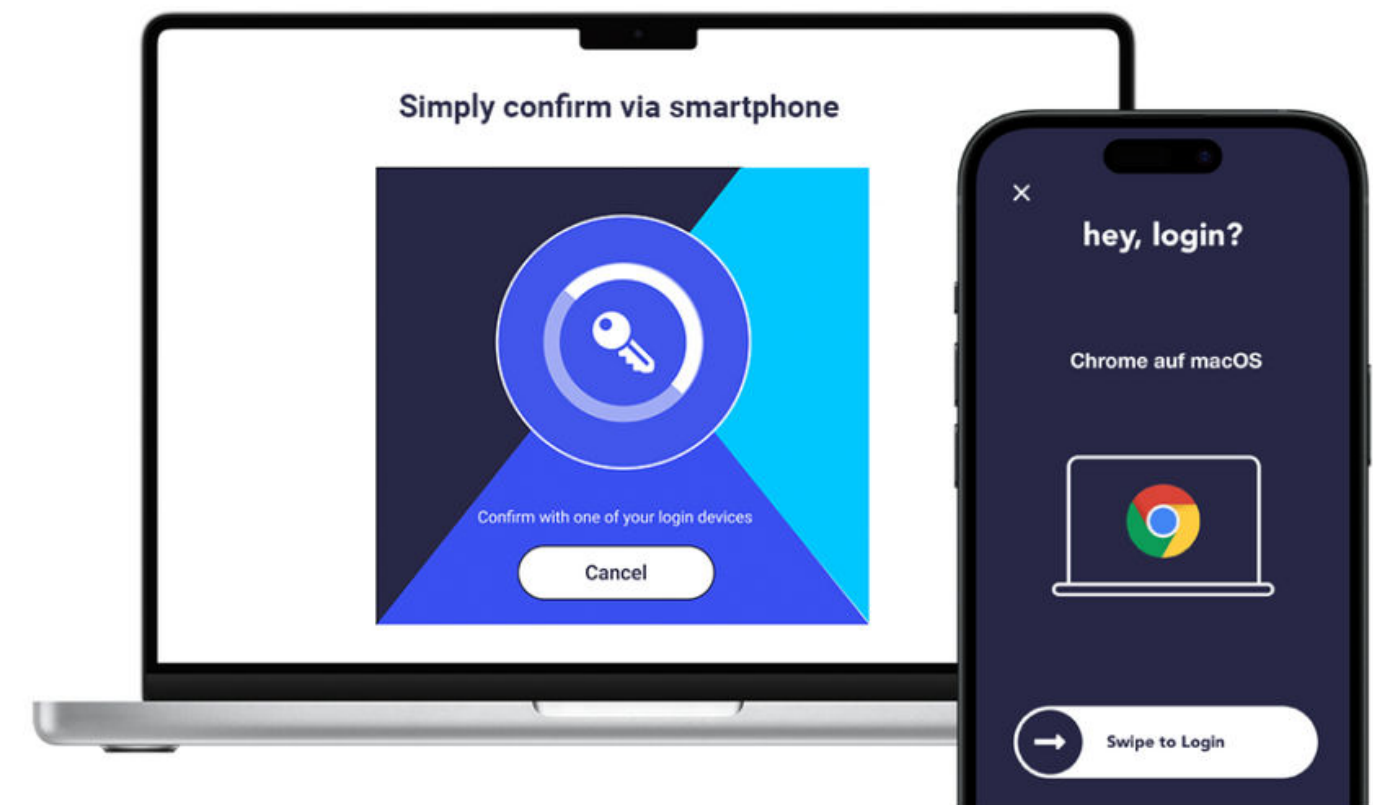

Geringe Akzeptanz bei Nicht-ITlern
(Niedrige Usability, Security nutzerabhängig)

heylogin ersetzt das Master-Passwort durch Hardware für **Einfachheit & Sicherheit**

Langes & komplexes Master-Passwort
muss regelmäßig eingegeben werden

Auf dem Handy bestätigen

1Password LastPass... | DASHLANE

Geringe Akzeptanz bei Nicht-ITlern
(Niedrige Usability, Security nutzerabhängig)

Hohe Akzeptanz
(Hohe Usability, Breach-Proof Security)

European password managers

A password manager is a software that allows users to store and manage passwords securely.

This category contains services from companies based in a member state of the European Union (EU), the European Economic Area (EEA) and the European Free Trade Association (EFTA).

You can read more about the listing criteria [here](#).

Smooth Experience

The UX here is really, really good. Almost too good, to be honest. I think for myself, the little hiccups and friction points that other password managers give me (Bitwarden, LastPass, 1Password, etc.) actually make me feel the security aspect of their services, even though that sounds counterintuitive. It's difficult to explain.

With heylogin, I don't feel any of this friction. At all.
